

Weekly Bulletin

I am so pleased with how well the children are doing. They have settled beautifully into our routines and are becoming increasingly confident in choosing activities independently.

Our fish tank is now home to six fish, and the children are thoroughly enjoying caring for them and watching them swim around. We hope to choose names for them very soon, which is already causing great excitement!

Next Week's Learning

Rhyme of the Week

1, 2, 3, 4, 5, Once I Caught a Fish Alive — a perfect link to our new classroom pets.

Maths

We will be exploring **colours and matching**, helping children build early sorting and categorising skills.

Phonics

Our focus will be **distinguishing sounds**, including identifying animals from the noises they make. This is an important early phonics skill that lays strong foundations for becoming confident readers and writers.

Stories We're Sharing

We will be reading:

- *Silly Billy* by Anthony Browne — our author of the half term
- *The Blue Balloon* by Mick Inkpen
- *I Am Enough* by Grace Byers, a beautiful story celebrating how unique and special we all are

You can explore more about Anthony Browne, Mick Inkpen, or Grace Byers if you'd like to learn about their work at home.

Junk Modelling Materials Needed

The children are absolutely loving the junk modelling table, but our supplies are running low. If you have any of the following, we would be very grateful:

- Small boxes (no larger than a cereal box)
- Cardboard tubes
- Yoghurt pots
- Paper cups or plates

Please remember: you will be the one carrying the finished masterpiece home, so smaller items are best!

Colour Sorting Ideas for Home

- **Coloured Paper Sorting** — Place sheets of coloured paper on the floor and invite your child to match toys to the correct colour. Start with two colours and build up gradually.
- **Pom-Pom Cup Drop** — Add coloured paper to the bottom of clear cups and let your child drop pom-poms into the matching cup. Tweezers or tongs can be added to strengthen hand muscles.

If you're feeling particularly brave:

- **Magnetic Wand Rice Tray** — Hide magnetic counters under dry rice and let your child “fish” them out with a magnetic wand before sorting them by colour. Counting each pile together adds a lovely maths element.
